Test workflow

1. Upload test data
2. Explore measurements
3. Review engineering metrics
4. Investigate events
5. Export reports
6. Compare two tests

Excel engineering report

Generate a structured, editable .xlsx workbook containing the selected-window data, metrics, events, grouped incidents, settings, and a native Excel chart.

The workbook chart is sampled for responsiveness and may omit brief spikes. The full selected-window measurements and all calculated events are included separately.

Prepare Excel engineering report

PDF engineering report

Create a concise four-page PDF summary for review and sharing. Detailed measurements remain in the Excel report.
